Matrix Comsec Announces Interoperability of Yealink IP-Phones with its IP-PBX

Matrix Comsec, the leading IP-PBX manufacturer in India and Yealink Network Technology Co. Ltd, a leading designer and manufacturer of IP Voice and Video Phones, have completed interoperability testing between Matrix IP-PBX and Yealink IP Phones.

Matrix IP-PBX is the integrated communication solution for small businesses and large enterprises encompassing advance features of SIP Proxy, Registrar and Presence server and offering universal connectivity through PSTN, GSM, ISDN and IP networks. Matrix IP-PBX is capable of handling voice and video calls over IP network besides centralized call control and media relay services. The open-standard SIP protocol support makes it suitable for interoperability with SIP proxies, gateways and various make IP-Phones. Matrix IP-PBX offers benefits of reduced communication costs, seamless connectivity and simplified management even to remote users and geographically dispersed branches.

Yealink IP-Phones support SIP standard and are equipped with efficient voice chipset and voice engine to offer better quality and high definition voice. Yealink IP-Phones embed rich features including auto-provision, PoE, security protocols and support for range of voice codecs.

"The Interoperability testing area included basic call management features, advanced enterprise grade features and complete feature transparency between IP-PBX and IP-Phones" said Sajeew Nair, Manager-Product Management for Matrix. "Matrix IP-PBX with Yealink IP-Phone portfolio – An affordable and feature rich solution-mix for SMBs, SMEs and large enterprises will enhance the customer satisfaction and will ensure the long term business opportunities."

"Cooperation with Indian local IP PBX manufacturer like Matrix Comsec is very important to us," said Stone Lu, vice president of Yealink, "It represents strength of Yealink to keep a foothold in Indian broad market as well as ensures that our mutual Indian customers will get a dependable and easy-to-use solution available for connecting people in new ways, anytime, anywhere."
