

Aditya Infotech ties-up with Global Leader in Fire Protection “Viking”

Aditya Infotech (AIL), India's No.1 Security Products Distribution House, has tied up with Viking, a global leader in Fire Protection, to distribute their vast products range including Sprinklers, Alarm Valve, Deluge Valve, Other Valves, Strainers, Flexible Drops, Flow and Pressure Switches, Supervisory Switches and Foam System, across the country. The offerings from Viking are specially designed and catered to FM Global Projects, Industrial Projects, SEZ project and Infrastructure and commercial Buildings.

“

Today, we are considered the light house of surveillance Industry in India. AIL marks its entry in Life & Safety industry by adding new brands in our portfolio. Adding Viking in our security portfolio, enabling us to offer complete security suite to our customers as per their need. With a comprehensive range of products, Viking has led the industry in the design and manufacture of the finest fire protection products

”

Yogesh Dutta, Vice President, Security BU, Aditya Infotech.

For over 80 years in Fire Safety Industry, Viking is highly acclaimed for its 'Quality Assurance', 'Innovation', 'a single-point solution destination for any fire protection challenge' and 'robust customer support with fast delivery'. The Valves and Systems are easier to install and maintain, to automated fabrication capabilities, Viking's product innovations have been developed by understanding the needs of the target customers. As the first U.S. sprinkler manufacturer to attain ISO certification (ISO certified since 1992), Viking remains committed to the ongoing refinement of its products – all of which are tested and listed by the major approval agencies around the world. These include Underwriters Laboratories (UL), Factory Mutual (FM), Loss Prevention Council (LPC), Verband der Sachversicherer (VDS) e.V., etc.

Matrix Launches IP based Surveillance Solution – SATATYA NVR400

Matrix Comsec, a leading manufacturer of enterprise security solutions introduces an IP based Surveillance Solution - SATATYA NVR400. This strengthens its portfolio of Video Surveillance products which already have DVRs and cameras. Matrix is intending to promote the product in domestic and international market simultaneously, considering the growth that security market offers. With the launch of SATATYA NVR, the video surveillance portfolio of Matrix has become more stronger.

“

While Video Surveillance is moving into its second lap with enormous momentum, traditional analog users are getting more-and-more inclined towards availing benefits of IP for improved video quality. Matrix Comsec has introduced this new IP series in its Video Surveillance product portfolio to provide traditional users as well as new users a migration path towards the IP world.

”

Kaushal Kadakia, Product Owner, Video Surveillance Solution.

This technically advanced SATATYA NVR400 allows scalability from 4 to 16 video channels and recording flexibility from full HD to D1 for crystal clear images. It allows sequencing of cameras in different layout formats and facilitates simultaneous live view and playback on a single window to simplify monitoring needs. This NVR along with recording and monitoring identifies irregularities and sends prompt notifications with event details in the form of SMS and Email to prevent any major losses. To safeguard the data, it allows performing scheduled or manual backup on a network as well as on USB. The search is made efficient by Date, Time, Recording type, Event and Alarm based leading to hassle-free playback. It supports 3G connectivity for wireless remote management and monitoring.
