

Array Networks Expands into Sri Lanka with Premium Partner VS Information Systems

Array Networks Inc., a global leader in optimized application access, security and delivery, today announced the launch of its operations in Sri Lanka. Array Networks has appointed V S Information Systems (VSIS) as their premium partner in Sri Lanka. VSIS will carry Array Networks complete line of application delivery networking products and solutions in the Sri Lankan markets.

Products:

- AG Series secure access gateways
 - APV Series application delivery controllers
 - WANVelocity Series WAN optimization controllers
- Solutions:**
- AccessDirect™ secure remote access SSL VPN solution
 - DesktopDirect™ secure remote desktop access solution

- Array's application delivery networking solution for Microsoft® Exchange Server 2010
 - Array's application delivery networking solution for Microsoft® Lync™ Server 2010
 - Array's application delivery networking solution for Microsoft® SharePoint® 2010
- With this partnership, Array Networks will strengthen its base in the top-end of the enterprise market in Sri Lanka. Speaking about the appointment, Mr Shibu Paul, National Sales Manager - India at Array Networks said "We have immense confidence in VSIS. They are one of the -leading distributors in the Sri Lanka market and their reputation is very good. Their understanding about new technologies was another plus point on why they were selected. The Sri Lankan markets are very mature to accept Array's technology rich products and solutions."

VSIS group is a proven and experienced distributor in the markets of Sri Lanka. VSIS are technically very sound and financially backed by the VSIS group. V S Information Systems founded as a part of VS Group of companies, aims to provide Information and Communication Technology (ICT) solutions and services to the Sri Lankan market using the best technologies and skills available in the global ICT industry.

Speaking about the tie up with Array, an excited Priyanga Gunasekera, CEO at VSIS said, "It's delightful to be part of Array Networks family. We understand the Sri Lankan market and we are confident to pick up the challenge of distributing Array's wonderful products & solutions in our market. We would require a lot of support from Array Networks and they are committed to assist us in the same."

DIGILITE DIGILITE introduces DL-AHD1S-K Motherboard with AMD processor

ADIGILITE has recently introduced DL-AHD1S-K Processor & upto 2GB VGA Share Memory DIGILITE motherboard brand of Smartlink Network Systems Ltd. The AHD1S-K is based on the AMD® Hudson D1 A45 chipset with an advanced AMD™ graphics engine with AMD UVD 3.0 technology. The AHD1S offers enhanced connectivity and entertainment capability, backed-up by high-performance features and components. This product is suitable for AIO, digital signage, diskless nodes, cloud computing applications. AHD1S-K offers UVD supports Blue-Ray and HD-DVD content, whilst offloading power and processor-intensive video decoding from the CPU to the graphics card. AHD1S-K supports AMD™ the Zucate APU™ processors with UMI technology, and supports Single DDR3 1066MHz memory for better overall system performance. This onboard Dual Core on board CPU @ 1.6GHz means users can enjoy higher frame rates on the latest gaming titles, utilizing the processing power of both discrete and onboard graphics processors.

DIGILITE DIGILITE launches a Super Summer Scheme "DIGILITE Karo Dil Se... Scratch & Win"

DIGILITE, the motherboard brand of Smartlink Network Systems Ltd. has launched its channel incentive scheme - "DIGILITE Karo Dil Se .. Scratch & Win" for its Dealers and Reseller community. The scheme covers the entire range of DIGILITE motherboards purchased from authorized distributors & DIGILITE PLATINUM partners and is valid from 1st April, 2012 till 30th June, 2012. Under the "DIGILITE Karo Dil Se .. Scratch & Win" offer, on purchase of each DIGILITE Motherboard, the person will be entitled to a scratch card, each scratch card contains

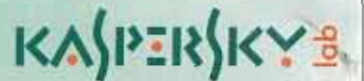

different denomination of points which can then be accumulated and redeemed for attractive prizes such as Honda Aetiva Bike, iPhone4, trip to Bangkok Pattaya, Nokia Lumia, Panasonic Handycam and many more at the end of the scheme period. Mr. Rajan Sharma, Vice President - Sales, DIGILITE said, "The scheme is designed entirely on feedback taken from our channels partners, with this scheme we bring to our partners a unique offer to help them realize the tangible benefits on an immediate basis. DIGILITE recognizes the need to reward its performing partners and is confident that schemes like this will go a long way in motivating partners to perform even better."

Last quarter DIGILITE launched Karo Dil Se - 2 scheme which got overwhelming response from channel partners across the country. DIGILITE is one of the fastest selling motherboard brands in India. DIGILITE motherboards have achieved significant market share in a very short span of time which in itself is a big achievement.

AV-Test.org: Kaspersky Endpoint Security 8 for Windows Is Once Again the Best Corporate Solution

The high quality protection provided by Kaspersky Internet Security 2012 and Kaspersky Endpoint Security 8 for Windows has been confirmed in a recent independent evaluation conducted by the AV-Test.org test lab. Following tests in January and February 2012, Kaspersky Endpoint Security 8 once again came out on top, with 16 points from a possible 18. At the same time Kaspersky Internet Security 2012 earned the highest marks for protection against different kinds of malware. Kaspersky Endpoint Security for Windows was by far the best performer in a monthly evaluation of business security solutions. It topped the rankings, scoring significantly more than the nearest competitor. It also achieved the highest score for protection and showed solid results for usability. In the remediation tests Kaspersky Lab's solution successfully removed 92% of active malware components, which, once again, was the top result in this evaluation. The overall score - 16 points - is significantly higher than the industry average of 12.8 points.

Kaspersky Internet Security 2012 achieved a total of 16.5 points out of a possible 18, much higher than the average result of 13.7. It also had the highest possible detection rate, effectively blocking 100% of threats in sophisticated real-world testing. In the remediation tests Kaspersky Internet Security 2012 detected all 39 samples of active malware and removed the active components for 92% of infections (much better than the average result of 77%).

Commenting on the results, Oleg Ishanov, Director of Anti-Malware Research at Kaspersky Lab, said: "We are absolutely confident that our business and consumer solutions provide the best protection against cyber threats currently available. This is fully confirmed by AV-Test.org where our products have been showing the highest results in detection tests for two months running. We are also glad that Kaspersky Endpoint Security 8 for Windows has maintained its status as the best security solution for businesses for the fourth time since July 2011."

MSI's Military Class III is transferred to the Lucky7 Slot machine. Will your good luck line up with the Military Class III mainboard?

Matrix Comsec receives 2011 INTERNET TELEPHONY Product of the year Award for SETU ATA211G, in recognition for its outstanding contributions to Internet Telephony Industry

Matrix Comsec was conferred upon with the 2011 INTERNET TELEPHONY Product of the year Award for its SETU ATA211G, a SIP based Analog Terminal Adaptor (ATA). SETU ATA211G is a SIP based Analog Terminal Adaptor, interfacing legacy telephone device with IP and GSM networks. It handles all the complexities of VoIP and GSM technology internally and provides simple telephone interfaces to make and receive calls. The advance call routing ensures any call placed through ATA, routes through the most cost-effective network.

The VoIP adaptor offers various features like Auto Configuration, 3-Party Conference, Peer-to-Peer Calling, DHCP Client, Dynamic DNS, Digest Authentication and Fax over IP (FoIP), Mobile Network Selection and many more. It is an ideal solution to suffice telephony needs of small office set-ups, teleworkers and residential users to save on long-distance calls by utilizing the existing broadband connectivity. Besides used as stand-alone device, it can also be integrated with existing PBX.

"I am happy to grant Matrix Comsec with the product of the

year Award. The editors of INTERNET TELEPHONY have verified that the SETU ATA211G demonstrates quality and innovation plus provides a real need in the marketplace," stated Rich Tehrani, CEO, TMC. "I would like to congratulate the entire team at Matrix for their commitment toward advancing IP communication technologies." 2011 Product of the Year winners are published in the January/February 2012 issue of INTERNET TELEPHONY magazine, INTERNET TELEPHONY has been the IP Communications Authority since 1998.
