

LATHE MACHINES, HI-CUT RANGE

Premier Lathe Mfg Co offers Hi-Cut range of Lathe Machines with rigid design, suitable for bulk production. These lathe machines combine all the features, which are expected in heavy-duty production lathes with great efficiency and are ideal for all sliding, surfacing and screw cutting operations. Following are the various special features of Premier lathes:

hardened and ground bedways, raw materials used is selected and grade quality raw materials; main spindle is hardened and ground with double grinding; and all screws made from bright steel with gun metal screw nut. Some of the technical specifications are: length of bed available from 2130 mm to 8000 mm, centre height is available – 400 mm and 450 mm, and spindle bore available from 80 mm to 200 mm. Also these lathe machines have a variety of attachments like full or semi Norton gearbox, taper turning attachment, rear tool post and coolant pump and many more.

UC CLIENT, VARTA WIN200

Matrix Comsec has launched Varta WIN200 – a Unified Communications (UC) Client for seamless collaboration, redefining communication experience with its variety of collaboration features and intuitive user interface. Powered by Matrix Sarvam UCS, Varta WIN200

empowers user to switch or extend the extension to their desktop computer. It offers real-time features such as Video Calling, Presence Sharing, Instant Messaging, Drag-and-Drop Conference and BLF Keys (up to 600). The Varta WIN200 elevates communication effectiveness and business productivity to the next level. With this device organisations can transform their desktop into a smart collaborative workstation. Varta WIN200 provides flexibility by allowing users to access services at any time in any place. Services are tightly linked to the user, providing unique levels of personalisation and control over the communication experience, leading to enhanced productivity. An example is the ability to access voice mail, text and instant messages from a single interface. Key features: corporate directory integration; 1000 DSS and 600 BLF keys for monitoring; popup window for incoming message and call; comprehensive call management – hold, transfer, forward, DND; presence sharing and instant messaging; video calling; drag and drop conference; and contact grouping.

CAPACITOR DISCHARGE (CD) STUD WELDER

Hi-tech Industrial Implements offers Capacitor Discharge (CD) Stud Welder. The CD process is designed specifically for thin gauge material where reverse marking must be minimal. With low cost, small light weight equipment, low cost studs are fast to load and weld and easy to jig and automate. This process produces good weld results with mild and stainless steel,

brass and aluminium ranging between dia 2 mm up to dia 8 mm in studs of different lengths. Short cycle/draw-arc offers more penetrative welds than the CD process. The “short cycle” process is suitable for hot rolled/coated materials, more tolerant of uneven and dirty surfaces. The process can be easily automated and can utilise the same low cost studs as the CD process. The process is the same as the drawn-arc but operates over a much shorter time period up to 100 milliseconds. The process is capable of handling material compositions of mild steel, stainless steel, alloy steel, etc., between dia 3 mm to dia 8 mm, on thin sheets using short cycle principle, as well dia 8 mm to dia 12 mm, on plates using drawn-arc. Hi-tech Industrial Implements is a leading distributor welding and cutting last more than 25 years, with major clients like BHEL, Midhani, Railways, L&T, defense organisations and private sector companies. The range of products includes: capacitor discharge stud welder; short cycle stud welder; short cycle drawn arc stud welder; drawn arc stud welder; IGBT inverter stud welder; drawn arc stud welder; capacitor discharge spot welder; dual pulse CD welder; capacitor discharge thermocouple welder; pan stud welding equipment; micro-spot welding head; micro spot welding head; stud welding guns; and hand held accessories.

INDUSTRIAL BEARINGS

Uttam Bearing offers a wide range of FAG Industrial Bearings. On an average the company has over one lakh bearing units in stock covering all standard sizes. It also carries a sizeable number of machine tool bearings and large size spherical roller bearings in stock. For users of any other brand of bearings or other local brands, the company is in a position to supply even these brands in very good quality and quantity. The company offers the best pricing with discounts in both FAG India and FAG imported bearings of all kinds. Uttam Bearing is an authorised industrial distributor of Fag Bearings based in Vadodara with offices in Mumbai and Nashik.
