

Matrix to showcase its high end security solutions at INTERSEC 2016 Dubai

Matrix, a leading telecom and security solutions company, will be participating at the INTERSEC 2016, Dubai. Matrix will be showcasing its well-engineered, enterprise grade security solutions encompassing Time-Attendance, Access Control and Video Surveillance solutions.

“INTERSEC has proven to be a great platform for us to spread our business on an international scale. This exhibition brings all prospective system integrators and customers on a common platform, enabling us to showcase our well-engineered products and explain how they can aid in changing their equation of growth, profitability and sustenance”, said Abhay Joshi, International Sales Manager.

Under Access Control solutions, Matrix will be showcasing COSEC ARC - Single Door Access Control, QR Code based Access Control, COSEC DOOR FMX - Multi Spectral Fingerprint Sensor, and Palm vein reader. For the Time-Attendance solutions, Matrix will exhibit the newly launched Job Processing and Costing solution at the exhibition.

Under the Video Surveillance domain Matrix will be launching SATATYA SAMAS, its enterprise grade Centralized Management Software, at the exhibition. SATATYA SAMAS is a fully distributed solution designed for 24X7 Video Surveillance needs of multi-location, multi-server organizations.

Matrix looks forward to meeting customers and prospective SIs at SA-11, Dubai from 17th to 19th January, 2016 to discuss their requirements and offer better solutions

Mul-T-Lock® launches website for its Smart Locking System - ENTR™

User friendly resource for ENTR information and Technical support gate

Mul-T-Lock® the launch of its dynamic, new website for ENTR™ – ENTRlock.com – the ground-breaking digital, keyless locking system for the residential and small business market. ENTRlock.com was designed to help consumers understand how they can transform their homes into smart ones, starting with their locking systems. ENTRlock.com offers a glimpse into the emerging world of smarthomes. The site was designed for user-friendly experience that's easy to navigate. It provides clear and visual guidance about ENTR™'s features, how it used, where to find a local dealer and intuitive technical support.

ENTR™ is in line with today's digital lifestyle. It's a key-free smart locking solution where users can select how they operated it – smartphone app, personal code, fingerprint, or remote fob – whatever works best or a combination of all. Furthermore, ENTR™ was designed for sustainability, from its rechargeable batteries, elimination of keys, remote technical support and through to its almost 100% recyclability.

“Created with the user experience in mind, the new ENTRlock.com is a beautifully designed website that provides the ultimate user-friendly experience, allowing customers to access product information and videos and then share it all across all major social networking sites,” said Kineret Muller, Marketing Director, Mul-T-Lock®. “We used the latest technology so the site is compatible with today's browsers and mobile devices.” First launched in January 2015 to resounding success and demand, the ENTR™ locking solution is now available in over 30 countries, across 4 continents and distributed by an extensive partner distribution network.

Visit www.ENTRlock.com and take the next step towards the IoT world of smarthomes. Easily locate your closest ENTR™ partner distributor.
