

## RAH Infotech along with Cisco organises Session on Security Networking and Meraki

RAH Infotech, the fastest growing value added distributor in India in association with Cisco Systems conducted a seminar on 'Security networking and Meraki' at Gurgaon recently. The seminar was organised to educate RAH Infotech's customers on Security networking and Meraki solutions from Cisco.

During the seminar, Manjeet Singh, Senior VP, RAH Infotech introduced to audience the legacy of RAH Infotech and its decade of accomplishments in the value added distribution arena. He threw light on the ways RAH Infotech adds value to its customers' businesses and how it is an extended arm of its channel partners and customers. The highlight of his brief note was the emphasis RAH Infotech is placing on IT Services, Managed Services and how well it is equipped to deliver the same to

its customers.

Arun Negi, Product Sales Specialist, Enterprise Networking, Cisco helped the audience gain knowledge on driving the mobility initiatives seamlessly by on boarding new devices and controlling it easily through the cloud managed Meraki dashboards. He also discussed the advantages of Meraki and how some of its features including Centralized Management, Network Insight and Monitoring, L7 Application Visibility, Virtual Stacking, IPv6 Support, Link Aggregation, Role-based Administration and Detailed Client Device Views help its customers gain competitive edge.

Srinath Biswas, Associate Account Manager, Cisco Security addressed the audience on ways to increase the network's reliability, usability and integrity by protecting systems from emerging cyber threats. He even discussed about

the next generation security solutions from Cisco including Cognitive Threat Analytics and Cyber Threat Defense intelligence solutions that detect, analyze and protect against both known and emerging threats.

The message from Cisco was 'Enhance your organisation with better security and Meraki system.'

During the occasion, Ashok Kumar, MD & CEO, RAH Infotech said, "Cisco's broad approach to security beats back the complexity in managing security products and their effectiveness. Security platforms built by Cisco are open and extensive, and enhance visibility, automation and more capability. Cisco security provides superior protection across the attack continuum and helps businesses deliver digital growth through layered processing engines and scalable cloud infrastructure." ■
