

Tally Bags "Make In India Award for Excellence 2015"

Tally Solutions has been awarded the "Make In India Award for Excellence 2015" in the category of Business Management Software by Crazy Mantra, an IT & ITES company based in Gujarat.

The award was conferred on Tally Solutions in recognition of their outstanding contribution in the field of accounting and taxation for almost three decades now. The award recognized Tally Solutions' industry leadership in the field of accounting and business management software, and their pioneering contributions towards simplifying the lives of Indian businesses. Various aspects were taken into consideration in the nomination and judging processes, covering areas like business domain, customer profile, product overview and capabilities.

"Getting awarded is always humbling, as you are acutely conscious of the journey that still lies ahead. Being recognized for our past efforts is highly motivating, and reflective of the focus we have had for this great country," said Bharat Goenka, Managing Director & Co-founder, Tally Solutions.

Polycom Unveils New Collaboration Solutions

Dedicated to enabling the workplace of the future today, Polycom has announced three new additions to its Polycom RealPresence Group Series solutions offering.

The Polycom RealPresence Touch solution is an easy-to-use next-generation touch control designed with simplicity in mind for the end user. Compatible with Polycom RealPresence Group Series, Polycom RealPresence Immersive Studio, and the new Polycom RealPresence OTX Studio, the RealPresence Touch control will feature an intuitive tablet interface that makes it easier than ever for users to control their visual collaboration experience.

The Polycom RealPresence Group Series 5.0 software will feature direct interoperability with both Skype for Business and Microsoft Lync environments, giving end users an enhanced voice, video and content collaboration experience. With this software, users will now have the ability to control Skype for Business/Microsoft Lync content directly from their Polycom Group Series system, just as they would in a Skype for Business/Microsoft Lync call.

"The Polycom RealPresence Group Series 5.0 software makes it easy for users to share content and receive high quality collaboration experiences, including exceptional audio and video performance, from any device in any location," said Ashan Willy, Senior Vice President, Product Management & Worldwide Systems Engineering, Polycom.

Matrix to Showcase its IP-PBX For Large Enterprises

Matrix Comsec is conducting an exclusive product showcase event of its large enterprise IP-PBX - ETERNITY LE in six cities in India. The first was conducted on 18th September in Delhi.

Matrix ETERNITY LE is a compact and thoroughly engineered IP-PBX designed for to serve communication needs of large enterprises. ETERNITY LE is a hybrid IP-PBX scalable up to 1344 analog and 999 IP users. During the event Matrix will showcase innovative features of the system and exhibit how it empowers modern enterprises to communicate, collaborate seamlessly. The objective behind this series of exposition is to make existing and prospective system integrators aware about the new-age features of ETERNITY LE and how does it suit the enterprise communication requirements.

Kerala startup Mission Launches Accelerator Prog with EY

The Kerala Startup Mission has launched a Business and Technology Accelerator programme for the startup companies in the state with the support of multinational professional service firm Ernst and Young.

Situated in the Drishya Building of KINFRA Film and Video Park in the state capital, the Accelerator has a fully equipped and functional office space of 1,500 sq.ft, where the selected startups will get a six-month training on business sophistication and skill enhancement. The facility was earlier inaugurated by Shri P.H Kurian IAS, Principal Secretary Industries and IT.

The programme would encompass mentorship support in all areas of business and technology including business strategy, finance, HR, investment proposals, emerging technology trends and market research.
