

MATRIX ANNOUNCES INTEROPERABILITY CERTIFICATION FOR PANASONIC SIP ENDPOINTS

Orange, July 30, 2012 – Matrix Comsec, 100% channel centric manufacturer of IP-PBXs and SIP gateways, announces interoperability of Panasonic KX-TGP and KX-UT series SIP Phone systems with Matrix range of IP-PBXs. This alliance leverages Panasonic's global leadership in the business telephone and DECT 6.0 cordless telephone markets with the Matrix ETERNITY and SAPEX IP-PBX communication system.

The Panasonic SIP Cordless Phones Systems boast outstanding voice quality and a range of productivity-boosting options in a feature-rich desk phone replacement. DECT 6.0 ensures no interference with wireless networks, and the convenient cordless design eliminates the need to run dedicated network wiring to each employee workstation.

“Matrix is excited to achieve interoperability with Panasonic SIP phones. This will provide yet another revenue stream for Matrix channel partners. Matrix continues to form alliances with leading SIP end point providers so that our distributors and resellers can provide the most versatile and interoperable IP-PBX solutions to their customers” said Shaun Trivedi, Director of Business Development for Matrix North America.

Panasonic's KX-UT series offers a communications solution for small and mid-size businesses that utilizes the latest in Hosted and Open Source PBX technology. Featuring wide-band, high-definition audio (G.722 codec) coupled with echo cancellation and an expanded acoustic chamber, the KX-UT series offers crisp sound quality for crystal clear conversation. The series is designed to complement a company's existing communication infrastructure, yielding a low total cost of ownership. The KX-UT670 Smart Desk Phone features a 7” touch screen and open source-based operating system so users can develop phone applications to enhance business operations. Additionally, the phone integrates with up to 16 Panasonic network cameras to show live video feed directly on the phone's high-quality video (H.264/720P) viewer. The KX-UT136-B is user-friendly and easy to operate, with 24 programmable feature/functionality keys. It features a six-line backlit graphical LCD and 2 Ethernet ports. The KX-UT123-B offers HD Voice, a three-line backlit graphical LCD and two Ethernet ports. All KX-UT series models are Power over Ethernet (PoE)-ready which eliminates the need for additional electrical adaptors. The energy-saving Eco Mode offers lowered power consumption and a two-year limited warranty protects a user's investment well into the life of the phone.

The KX-TGP500/550 systems offer convenient, cordless designs that eliminate the need to run dedicated network wiring to each employee work station while incorporating DECT 6.0 to ensure no interference with wireless networks. All Panasonic SIP models are HD Voice enabled, allowing for outstanding voice quality, and offer flexible system expandability.

ABOUT MATRIX COMSEC

Established in 1991, Matrix is a leader in Telecom and Security solutions for modern businesses and enterprises. An innovative, technology driven and customer focused organization; the company is committed to keep pace with the revolutions in the telecom and security industries.
