

# Matrix Comsec launches New Factory in Vadodara

11 October, 2012

Established in 1991, Matrix Comsec is a versatile designer and manufacturer of Telecom and Security products which are marketed in more than 50 countries. Matrix has recently inaugurated its new Manufacturing Unit at Waghodia, in Vadodara. The launch of the factory reinforces Matrix vision of providing innovative world-class Products and Solutions for a better tomorrow.

The new manufacturing unit is spread over an area of 78,000 sq. ft., and is operated by well qualified and dedicated team of engineers. The new structure houses departments like Production, Testing, Quality Control, Stores and Despatch. Universally practiced production and quality processes have been implemented in the new factory. It endeavors for harmony with nature and has considered ecological aspects like rain water harvesting and the usage of waste water.

The new manufacturing facility envelops various energy conserving techniques which reduces energy consumption and carbon emissions. It will provide an ecologically sensitive, energy-saving, waste reducing and a healthy environment for employees. Speaking on the occasion, Mr. Ganesh Jivani, the Managing Director of Matrix Comsec said, "Matrix is among the few Indian companies which indigenously manufactures and markets both Telecom and Security products. Today Matrix is positioned as a qualitative and competitive product manufacturer on the global plane and has introduced more than 40 innovative products through continuous research and development activities; strengthening its global competency. We see this new unit as a great opportunity to extend our product development capability in order to best serve the needs of our customers and the market worldwide."

The new unit will use state-of-the-art technology to manufacture products that will serve the growing demands of both Domestic and International market. By closely studying the evolving needs of the global market, the company will now be able to pioneer new products in the market, strengthening the portfolio of both Telecom and Security products.
