February 17-19, 2013 | Stall No: 2G20
Dubai International Convention & Exhibition Centre

Matrix, a leading manufacturer of telecom and security products, is participating in the MEE-2013. Matrix will showcase its complete range of telecom and security products and solutions along with its field-proven PLCC products.

At the event Matrix will also launch its “Defence PBX” – communication system specifically designed and developed to address the needs of Defence organizations. It supports interfaces for CO, LD, ISDB BRIU, E1/PRI (Fiber/Copper), GSM/3G, E&M, Data, and HF/VHF/UHF Radios. Citing about the benefits of Defence PBX, Mr. Ruchir Talati – Product Manager of Matrix said “Matrix Defence communication system is engineered to offer reliable performance under all arduous situations.”

Matrix will also showcase its new generation PLCC Exchange (PABX) specifically designed to meet the communication needs of Sub Stations; Power Generation Stations; Load Dispatch Centers; Control Rooms and Power Grids. These exchanges can be seamlessly integrated with MUX/VSAT/PDH/SDH/Radio network using appropriate interfaces like E&M, CO, IP and T1E1PRI. There are more than 1500+ installations globally in various electricity utilities and power grids.

MEE-2013 is a meeting place for international companies to showcase their products and solutions to key decision makers. “We look forward to greet our customers at stand number 2G20 to discuss requirements and offer prompt solution to fulfill their growth aspirations.” said Ruchir Talati.
