

Explore and enhance the communication experience with new business phones from Matrix Comsec at CeBIT-2012, Hannover, Germany

India, 1st March 2012

Matrix Comsec, a leading manufacturer of Enterprise Telecom and Security solutions, is participating in the biggest event of electronics –CeBIT 2012 at Hannover. Matrix will be showcasing its comprehensive portfolio VoIP products such as IP-PBX, VoIP Gateways and New IP and Digital Phones.

“Since last 8 years, we have introduced innovative products to the world through this platform and this year also we are showcasing our new IP and Digital phones to the international market.” said Sajeev Nair, Product Manager for Matrix Comsec.

“The new IP Phone– SPARSH VP330, will be an attraction for the event and will offer us an opportunity to understand how well we have matched our customer requirements.” said Sajeev. “The new model in the range – SPARSH VP330 is the intuitive and color touch-screen IP phone. The phone is ergonomically designed for executives, professionals and knowledge workers from any business.”

“Besides SPARSH VP330, we will also showcase our new digital key phone – EON310 at CeBIT. The phone is designed meet the requirements of executives from small businesses.” Sajeev continues.

“Terminals play an important role for daily communication and the intelligently designed terminal adds convenience and comfort to the office user. Considering the importance of phones for daily communication, we have designed these phones assessing our customer feedbacks and suggestions. To discover more about these phones and other Business solutions offer by Matrix Comsec, please visit us at CeBIT.” concluded by Sajeev Nair.
