

London's Premier Independent Safe Deposit Box Centre uses Matrix Access Control Systems to Provide the Highest Graded and Advanced Security.

Case Study

Customer Quote:

“Range of configurability of the Matrix COSEC CENTRA software allows us to accomplish quite sophisticated logic at our high-security vault which we have found other software unable to match.”

- Sam Patel, Managing Director

COMPANY PROFILE:

Sovereign Safe provides deposit facilities that truly push the global standards of the safe deposit industry. With the very latest modular high compression steel vaults constructed and installed by specialist manufacturers, state-of-the-art biometric access with complete audit trail from electronic alarmed lockers, Sovereign stands unrivalled as a leader amongst any high-security facility anywhere in the world. No high street bank nor any safe deposit centre can match their credentials and the extraordinary security levels they have achieved.

CHALLENGES:

People across the country have been targeted for their valuables, not only on the streets but also in their homes. Challenges were to offer complete peace of mind by delivering highest-level of security and access permission through various levels of security check (e.g. Card and Biometric Palm Vein Reader).

- **Industry:** BFSI

Applications: Advanced Access Control Solution with Palm Vein based Biometric Controllers

SOLUTION:

Matrix solved these challenges by providing Site Controller, Premium Door Controller, Unique Palm Vein Reader, RFID readers and a 2-Door Weigand Controller for fulfilling advanced access control needs. Matrix Access Control solution helps boost security through access control barriers and door controllers. The offered solution is designed to address security concerns in a professional and systematic method without compromising hospitality and productivity. It allows enrolling visitor's Fingerprint/Palm Vein Reader/RFID Card to provide the visitor with access to the restricted area as per below criteria:

2-Person Rule:

User-based Access Control that requires at least two authorized people for access

Anti-Pass Back:

Restricts the user to enter a secured area for the second time without leaving the area for the first time

Route based Access:

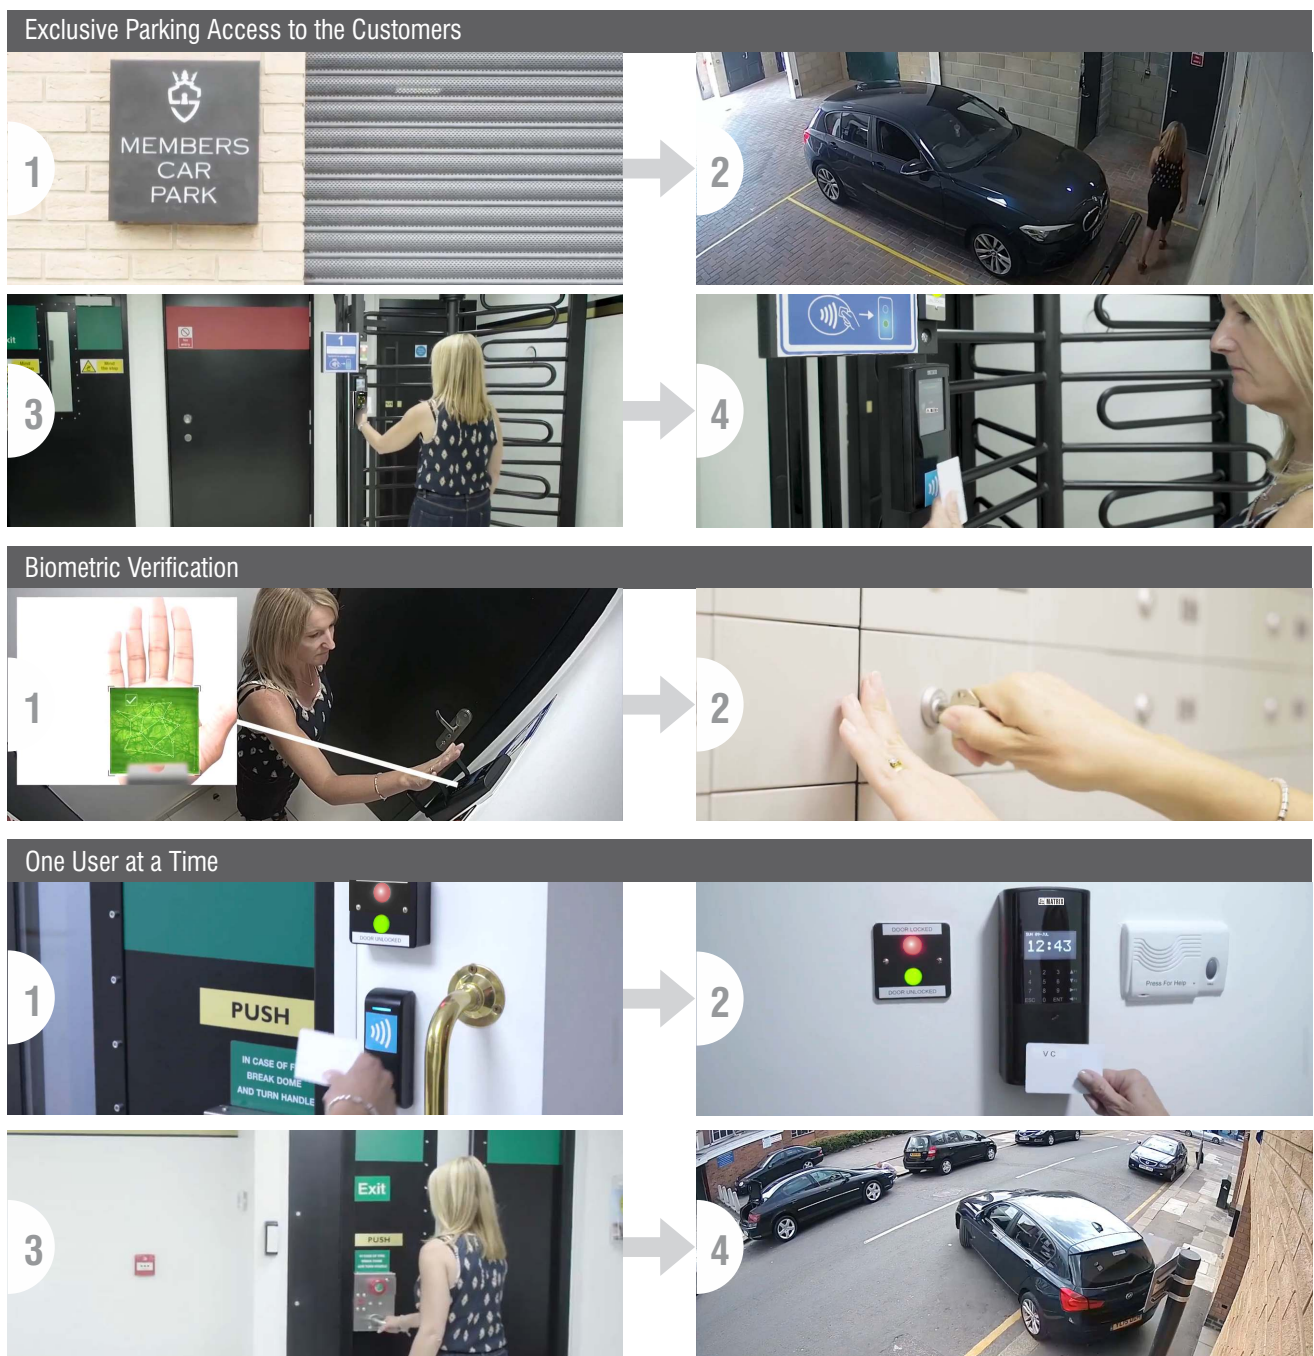

Allows access through the authorised route only

Access control Feature:

Time zone wise Access Control for Visitors and Staff

SOLUTION DIAGRAM:

RESULTS:

- Peace of Mind
- Seamless Experience
- Increase the Productivity of Staff
- Quick Actions on Exceptions
- Multi-layer Authentication
- Boost Customer Satisfaction
